**SENATOR RICHARD LUGAR PROVIDES GLOBAL INSIGHTS TO ADAYANA CLIENTS AND GUESTS AT WASHINGTON, D.C. GATHERING**

INDIANAPOLIS, IND. – Adayana hosted an industry luncheon for company clients and agriculture leaders in Washington, DC, on June 5. Indiana Senator Richard G. Lugar was the speaker.

In his introduction, Adayana President and CEO Mike Jackson said, “Senator Lugar exemplifies what the founding fathers had in mind for Congressmen and Senators: A Citizen Statesman.”

Current Chairman of the Senate Foreign Relations Committee and former Chairman of the Agriculture, Nutrition and Forestry Committee, Senator Lugar stressed the close linkage between food production and global trends. “We are going to have to have substantially more food grown as most of the world’s population has seen a substantial increase in their standard of living.”

*Jackson said Adayana is committed to helping organizations build productivity by enhancing performance of people. “We are committed to creating bridges at the cross-section between non-profits and their members, government agencies and industry. The companies, organizations and federal agencies we work with are primarily in the categories of agriculture, food, transportation, defense, and homeland security -- sectors that are all influenced by the policy areas Senator Lugar has dedicated his career to,” Jackson said.*

With more than 250 employees in the U.S. and India, Adayana currently serves clients in three vertical markets – the Federal government sector through VERTEX; agriculture, food, life sciences and non-profit sectors through ABG, and the automotive aftermarket through Adayana Automotive. Adayana’s comprehensive performance improvement services include technology enabled learning, enterprise effectiveness solutions, technology integration and managed learning services.
